

KakaoPay Korean Payment Gateway for Magento 2 - User Guide

This user guide will provide you with detailed instructions on how to configure the KakaoPay Korean Payment Gateway for Magento 2 extension in your Magento store.

1. Installation

To install the KakaoPay Korean Payment Gateway for Magento 2 using Composer, follow these steps:

1.1. Connect to your server using SSH and navigate to your Magento installation directory.

1.2. Run the following command to require the extension package from the Adobe Marketplace i.e:

```
composer require seoulwebdesign/kakaopay
```

1.3. After the package has been added, run the following commands in sequence:

```
php bin/magento setup:upgrade php bin/magento setup:di:compile php bin/magento setup:static-content:deploy php bin/magento cache:flush
```

1.4. The extension is now installed and ready for configuration.

Configuration

1. Log in to your Magento store's admin panel.
2. Navigate to **Stores > Configuration > Sales > Payment Methods > KakaoPay**

3. Configure the following settings:

- **Merchant Code:** Enter your unique KakaoPay Merchant Code provided during the sign-up process with KakaoPay.
- **Admin Key:** Enter your KakaoPay Admin Key, also provided during the sign-up process.
- **Payment Action:** Select either "Authorize and Capture" to automatically capture funds when an order is placed or "Authorize" to only authorize the payment and capture funds later.
- **Available Cards:** Select the Korean credit and debit cards you want to accept for payments. Enable each card individually by checking the corresponding box.
- **Payment Method Type:** Choose between "Card" to accept payments using the available cards you've enabled or "Money" to accept payments using the customer's KakaoPay wallet balance.
- **New Order Status:** Select the appropriate order status for new orders from the list of available order statuses in your store.
- **Payment from Specific Countries:** It is recommended to select "South Korea" as the only country to accept payments from.
- **Instructions:** Provide any additional instructions that will be displayed in the frontend during the checkout process.
- **Sort Order:** Enter a number to determine the position of the KakaoPay payment method in the list of available payment options during checkout.

4. Click **Save Config** to apply your settings.

With these settings in place, the KakaoPay Korean Payment Gateway for Magento 2 extension is now configured and ready for use in your store. South Korean customers will be able to choose KakaoPay as a payment method during checkout and pay using their preferred card or KakaoPay wallet balance.

Testing Payments with the KakaoPay Korean Payment Gateway for Magento 2

After configuring the KakaoPay Korean Payment Gateway for Magento 2 extension, it is essential to test the payment process to ensure everything works smoothly. Follow these steps to test payments using the KakaoPay extension:

Prerequisites:

- Make sure the KakaoPay Korean Payment Gateway for Magento 2 extension is installed and configured on your Magento store.
- Install the KakaoTalk app on your mobile phone. The app is available for download from the [Google Play Store](#) for Android devices and the [Apple App Store](#) for iOS devices.

Step 1: Obtain the test merchant code and admin key

- Use the test merchant code: TC00NETIME.
- Obtain the admin key by creating a new app on the [Kakao Developers Console](#). After creating the app, navigate to the app's settings and copy the Admin key.

Step 2: Configure the extension with the test merchant code and admin key

- Log in to your Magento store's admin panel.
- Navigate to **Stores > Configuration > Sales > Payment Methods > KakaoPay Korean Payment Gateway**.
- Enter the test merchant code and admin key in the corresponding fields.
- Click **Save Config**.

Step 3: Test the payment process

- Visit your Magento store's frontend and add a product to your cart.
- Proceed to the checkout process and select the KakaoPay payment method.
- Complete the checkout process.
-

Step 4: Complete the test payment

- If testing on a desktop, scan the QR code displayed on the payment screen with the KakaoTalk app on your mobile phone.
- If testing on a mobile device, the KakaoTalk app will open automatically when prompted during the payment process.
- Follow the steps in the KakaoTalk app to complete the test payment.

If the test payment is successful, it confirms that the KakaoPay Korean Payment Gateway for Magento 2 extension is working correctly on your Magento store. Remember to switch back to your live merchant code and admin key in the extension's configuration when you have finished testing.
